DETAILED ACTION
EXAMINER'S AMENDMENT

Drawings

1 The following changes to the drawings have been approved by the examiner and agreed upon by applicant:

Annotate drawing figures 1-5, 6A, 6B, 7A, 7B, 8A and 8B, submitted 29 October 2004, "Replacement Sheet".

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Response to Amendment

2 Applicant amendment overcomes §102(b) rejection of claims 1, 3, 5, 7, 8 and 12 and the rejection is withdrawn.

Applicant amendment overcomes §103(a) rejection of claims 2, 4, 6 and 11 and the rejection is withdrawn.

Allowable Subject Matter

3 Claims 1-8 and 11-17 are allowed.

Reasons for allowing claims 13-15 were indicated in office action mailed 6 June 2005.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites, in part, "said input object defining a characteristic part of a cutting tool, the input module means permitting the selection of input objects and inputting their input parameters and making a supply of measurement objects accessible, from among which measurement objects are selected and linked with input objects or input parameters". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claims 2-7 depend from claim 1.

Claim 8 recites, in part, "actuating a measurement program module for generating, from the chosen selection of measurement objects and their linkage with input objects, a measurement program for controlling a measuring device, wherein there is determined from the selected input objects, which are each linked with a machining operation and from the associated inputs, a geometrical model that defines the surface of a tool, wherein the geometric model is displayed". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claims 11 and 12 depend from claim 8.

Claim 16 recites, in part, "display module means for visually displaying a geometric model that defines the surface of a tool resulting from the chosen selection of input objects and the inputs". This feature in combination with the remaining claimed structure avoids the prior art of record.

input objects and the inputs". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claim 17 recites, in part, "measurement parameters are defined on the basis of the selected input objects and associated input parameters and wherein inspection points are among the measurement parameters". This feature in combination with the remaining claimed structure avoids the prior art of record.

It is these limitations, which are not found, taught or suggested in the prior art of record, and are recited in the claimed combination that makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
